

Deployment

Part 1: Setting up

In the previous videos...

In this video...

- Creating an AWS account
- Creating an IAM user with least privilege policy
- Generating access keys
- Installing the AWS CLI
- How to configure AWS CLI
- Verifying the setup is complete

Create an AWS Account

- Go to the AWS website (<https://aws.amazon.com>)
- Click “Create account”

- Fill in the necessary details and follow the steps as required to complete creating an account

Create an IAM User

Create an IAM User

- Initial steps:
 - Log in with your AWS account
 - Navigate and sign into AWS Management Console

Generating Access Keys

Identity and Access Management (IAM)

Search IAM

Dashboard

Access Management

- Roles
- Policies
- IAM users
- IAM user groups
- Identity providers
- Account settings
- Root access management
- Temporary delegation requests

Access reports

- Access Analyzer
 - Resource analysis
 - Unused access
 - Analyzer settings
- Credential report
- Organization activity
- Service control policies

IAM users (1)

Info

Delete

Create user

Search

< 1 >

An IAM user is an identity with long-term credentials that is used to interact with AWS in an account.

	User name	Path	Group:	Last activity	MFA	Password age	Console last sign-in	Acc
	calculator-admin	/	0	-	-	2 minutes	-	-

Search

[Alt+S]

Global

Tia

IAM > IAM users > calculator-admin > Create access key

This is the only time that the secret access key can be viewed or downloaded. You cannot recover it later. However, you can create a new access key any time.

Step 1

Access key best practices & alternatives

Step 2 - optional

Set description tag

Step 3

Retrieve access keys

Retrieve access keys [Info](#)

Access key

If you lose or forget your secret access key, you cannot retrieve it. Instead, create a new access key and make the old key inactive.

Access key

Secret access key

***** [Show](#)

Access key best practices

- Never store your access key in plain text, in a code repository, or in code.
- Disable or delete access key when no longer needed.
- Enable least-privilege permissions.
- Rotate access keys regularly.

For more details about managing access keys, see the [best practices for managing AWS access keys](#).

[Download .csv file](#)

Done

Installing the AWS CLI

- Search for the AWS CLI download for your OS
- Download the installer
- Run it
- Verify the installation was successful

```
PS C:\Users\user> aws --version  
aws-cli/2.34.55 Python/3.14.5 Windows/11 exe/AMD64
```

Configuring the AWS CLI

```
PS > aws configure
```

Tip: You can deliver temporary credentials to the AWS CLI in'.

```
AWS Access Key ID [None]:  
AWS Secret Access Key [None]:  
Default region name [None]: us-east-1  
Default output format [None]: json
```

Verifying Setup

```
PS [redacted] > aws sts get-caller-identity
{
  "UserId": "[redacted]",
  "Account": "[redacted]",
  "Arn": "arn:aws:iam::[redacted]:user/calculator-admin"
}
```
